Additiv-Chemie Luers – Your Specialist for Lubricant Additives

We develop and produce products custom-tailored to our clients’ very needs

Besides standard additives for the formulation of concentrates for metalworking fluids and Industrial lubricants we are focused on personalised customer solutions:

- Additives for the formulation of lubricants, cleaners and corrosion preventatives
- Market leader for custom-tailored additive packages for the cost-effective production of your products
- Professional and personalised technical advice
- Customer service and flexible logistical support

Our Company

We are a medium-sized company operating worldwide, focused on our customers.

Why Additiv-Chemie Luers?

- **Customer orientation** through development of tailor-made products in close cooperation with our clients
- **Quality supplier** certified according to DIN EN ISO 9001
- **Focus on logistics** with spacious warehousing and extensive tank farm capacity
- **Technology minded** by early recognition of new technological industry trends
- Steady company development by **ongoing modernisation** of facilities
- **Production orientated** with more than 80 on-site blending storage vessels some with heating or cooling facilities
- **Environmentally friendly** waste recuperation
- **Use of renewable energies** through large photovoltaic panels

We operate according to the hanseatic traditions of quality products and ethics in trading. Our guideline is: “Business is made between people”.
